- general grounds cleared at 2:00 am

MON 5/5
-Campers clear at 12pm.

Location: Carson Creek Ranch

Address: 9501 Sherman Rd - Austin, 78742

Description: A scenic 58 acre ranch nestled on the banks of the Colorado River. Area is mostly industrial or agricultural as it is in the low flight path of Bergstrom Airport. There is a small number of residences the

nearest being more a half mile away from the directions of the event's PA system. We received no noise complaints over the course of the event last year.

County Liason/ Security Director: Scott Davidson (The Electric Company) - 1901 E. 51st St - Stage 4 - Austin, 78723
512-656-2184

Event Production Manager: Ryan Miller 512-659-0104 rmiller205@me.com

Promoter: Reverberation Appreciation Society - 4400 Garnett - Austin, TX 78745

Land Owner: Joan Havard - 8801 Willowick Dr - Austin, TX 78759 - 512-758-9076

Expected attendance: 3000 per day. Max attendance 5000. While it is not expected, no more than 5000 tickets will be issued for the event and we will publicize that the event is sold out. We anticipate 1000-1500 guests to camp on site in a secured area- if it appears this number may be exceeded we will notify the county promptly and will adjust accordingly.

Scheduled to perform:
PRIMAL SCREAM (UK) • LOOP (UK) • THE BLACK ANGELS (US) • THE ZOMBIES (UK) • oF MONTREAL (US) • THE HORRORS (UK) • BLACK LIPS (US) • AVEY TARE'S SLASHER FLICKS (US) • LIARS (US) • UNKNOWN MORTAL ORCHESTRA (US) • MONO (JP) • TOBACCO (US) • DEAD MEADOW (US) • ONEOHTRIX POINT NEVER (US) • MOON DUO (US) • TOY (UK) • WOODS (US) • LA FEMME (FR) • JACCO GARDNER (NL) • EARTHLESS (US) • ZOMBIE ZOMBIE (FR) • ACID MOTHERS TEMPLE (JP) • KADAVAR (DE) • SHANNON & THE CLAMS (US) • THE GOLDEN DAWN (US) • YAMANTAKA // SONIC TITAN (CA) • BARN OWL (US) • TERAKAFT (ML) • WHITE HILLS (US) • DESTRUCTION UNIT (US) • QUILT (US) • JOEL GION & THE PRIMARY COLOURS (US) • GAP DREAM (US) • KING GIZZARD & THE WIZARD LIZARD (AU) • BOOGARINS (BR) • LORELLE MEETS THE OBSOLETE (MX) • AQUA NEBULA OSCILLATOR (FR) • THE OSCILLATION (UK) • STEVE GUNN (US) • CIRCUIT DES YEUX (US) • THE YOUNG (US) • FANTASMES (PR) • KIKAGAKU MOYO (JAP)

Nature of performances: All performers will be playing music on one of 3 stages, roughly 45 mins to 60 min sets. 1pm to 1am. The original statue from 1989 requests names and addresses of of performers and their agents. This information is not shared with the promoters and with over 60 bands from all over the world, acquiring this information would prove very difficult.

Sanitation Health We plan to supply a minimum of 80 Port-o-potties provided a local vendor on site at the event with 6 ADA units. All units will be serviced and pumped nightly. Adequate pump sinks will be provided and maintained with water and paper towels. There will also be several restroom trailers on site, each with running water.

For food service and bar will have required sinks for hand washing. All food vendors are self-contained food trucks and trailers with county and city permitting. We have also arranged for onsite gray water, and grease trap storage maintained by a sanitation vendor. Vendors have been notified that no external gas tanks will be allowed on site. We are expecting 12-15 food vendors.

Traffic Control: See Map Attached.. Traffic Control is a high priority for the event producers. **We look forward to discussions with TXDOT on how to improve the traffic plan from last year's events at the site. Until those meetings we will present the traffic plan from last year.**

We will be very specific with instructions to our attendees. After meeting with TXDot,

County, and city ROW officials, we agreed that my suggestion to have patrons heading eastbound on 183 and 71 both merge onto 71 and exit Spirit of Texas Dr. then loop under Hwy 71 to go westbound to access a a safe merging right turn on Old Bastrop Hwy. From here they will turn Right on Dalton and proceed to the festival entrance at Giraffe Pen Rd. If deemed necessary, we plan to utilize message boards to relay event traffic the safest route into the site.

Message Boards will read:
From 183- Phase 1 -

And Uturn
On W71
Event
Exit
Next Rt

Our event site will have 2 separate entrances, one for local traffic, production, and emergency use only (Sherman Road) and one for public use Giraffe Pen Rd. Dalton Rd will be our main point of entry and we have secured parking on land owned by Jimmy Evans Construction next to the event site. There is .42 mile of road on Giraffe Pen Road to accommodate cars queuing into the parking lot and more if we line up cars from the furthest point from the road. If deemed necessary, we will work with Travis County Sherriff's office to hire staff in patrol cars to be a presence at these vital points of entry.

Directions to the site will be detailed and specific and guests will be strongly encouraged to follow the agreed upon routes. We feel the presence of Travis Co Sheriffs will assist this along with ample legible approved signage that will guide event goers safely to and out of the site to main arteries and keeping traffic out of neighborhoods. Parking at the site will be done quickly and payment for parking will be done after the car is parked to minimize delays.

Egress from the site would require a right turn onto Dalton Ln from Giraffe Pen Road Sheriffs on site can assist to keep traffic flowing for the out at the end of the night to

expedite exit off the property. Patrons will process left on Hergotz and Left on Thompson to the light at US 183 led by visible signage in plain view out of the ROW with property owner's permission. From this point patrons can go left or right onto the highway. I will work with Brian Craig with the city of Austin to time this light during mass exit times to minimize backups at this location.

Once off major arteries 30x30 directional signs will be placed along Dalton Ln for Ingress to let patrons know where to turn. For Egress 30x30 signs will guide patrons from the event back to the highway and will be placed at each turn on the exit strategy. Finally, TXDot has asked that plastic drums be places in front of a service pole near the turn for Dalton Lane. We will comply with this safety request.

Medical: To provide medical care for patrons at our event we are contracting event specialist EMT group, Capital Medical Services. We will staff a minimum of 1 EMT and 1 Paramedic 24 hours a day when patrons are on site from a highly visible medical station. This staffing number will increase based on programming and ticket sales numbers. Capital Medical Service can also provide a standby ambulance service and the additional personnel to staff it during hours the festival grounds are open should the county deem it necessary. Capital Medical Service will also utilize a stretcher-bearing ATV vehicle to patrol and transport patients within the grounds. All medical staff will be on 2-way radios in direct communication with festival public safety staff.

Security: We have contracted with Vigilant Security and Event Services as our private security provider. Working under the direction of our Public Safety Director, Vigilant security will provide licensed, uniformed level 1 guards for access control, loss prevention and public safety 24 hours a day while patrons are on site. The will be a minimum of 20 security officers staffed during peak hours. All security and event staff will be equipped with 2-way radios with established communications protocols and chain of command. In addition to those officers working traffic and cash-room roles, 2-4 peace-officers dedicated to internal security and crowd management will be retained during hours of operation of the festival grounds. Security officers will maintain a 24-hour presence within the camping and festival grounds. Lost and found will be maintained at the front box office.

Minors in Attendance: A legal guardian who is attending the festival with them must accompany all persons under the age of 16 or they will not be admitted. All attendees over 21 who have verifiable proof of their age and who choose to drink will be issued a wristband to clearly differentiate from those underage and to prevent underage drinking.

Tents on Premise: Per request of Travis County, we have notified all tent providers that Flame Retardant Certificates must be permanently attached to. Only one tent will be used for cooking in the backstage area and will not be accessible by the public. Exit signs and extinguishers will be provided at any tent in which it is deemed necessary.

Power: Power for the event will mostly be from onsite Diesel Generators, you will find the locations of the generators. These are:

1. Behind the main stage (175 KVA)
2. Behind the Large Tent Stage (125 KVA)
3. Next to General Store and campgrounds (95KVA)
4. Behind Sponsor Tent (95 KVA)
5. Near tent #6 at entry way (95KVA)

6. Existing power will be used via a code compliant subpanel and distro located at power pole next to the pavilion.

Whenever possible generators are placed behind fences out of the public view. In the case of example 4 and 5, those generators will be fenced and scrimmed to keep public out. Generators will arrive to the site fully fueled with the estimated amount needed for the weekend. Should refueling be required we will bring in a fuel truck from off site after event hours to replenish supplies. The fuel truck will leave the premises following this action.

Application for Secondary Employment of Law Enforcement

TODAY'S DATE: 4/2/14

Person/Business/Organization Hiring Officer: The Electric Company

Address: 1901 E 51st St Stage 4 **City:** Austin **State:** Tx **Zip:** 78723

Contact Person: Scott Davidson **Phone:** 512-656-2184 **Fax:** _____ **E-mail:** Scott@ElectricCompanyLive.com

If Person, Driver's License & State: 15574004 **Person SSN or Business Tax ID:** 27-2405578

☒ **Traffic Control** ☒ **Security** ***No. of Deputies:** 6 ***No. of Vehicles:** 2 ☒ ***Uniform** ☐ ***Non-Uniformed**

*THE TRAVIS COUNTY SHERIFF'S OFFICE RESERVES THE RIGHT TO DETERMINE THE NUMBER OF OFFICERS NEEDED FOR ALL REQUESTS AND IF JOB REQUIRES NON-UNIFORMED OFFICER(S).

☒ **Temporary** (1 time or less than 6 months) ☐ **Periodically** (throughout year) ☐ **Permanent** (regular basis or for 6 or more months)

Start Date: 5/2/14 **End Date:** 5/4/14 **Start Time:** 1:00pm **End Time:** 3:00am **Event Title:** Psych Fest

Purpose of Request: Traffic Control, Event Security

Job Location (include facility name and address): Carson Creek Ranch- 9507 Sherman Rd Austin, Tx 78742

Person Officer Will Report To: Scott Davidson **Contact No.:**(cell phone preferred): 512-656-2184

Comments: This Application is a revision, to proper form. On Site-Please text if calls are not answered.

ALL REQUESTS ARE SUBJECT TO APPROVAL: Local background checks are done on individuals requesting security for private functions. Requests are only filled if there are officers available, we cannot guarantee your request will be filled. Officers are not allowed to work out of Travis County, unless approved by the Sheriff or the Sheriff's designee.

SUBMISSION OF APPLICATION TIMELINE:

- Events that will have less than 500 attendees must be submitted at least 14-business days prior to event.
- Events that will have 500 – 1,000 attendees must be submitted at least 30-business days prior to event.
- Events that will have 1,000 or more attendees must be submitted at least 60-business days prior to event.

OFFICER RESPONSIBILITIES: A Travis County Sheriff's Officer's primary responsibility while working in a secondary employment capacity, in uniform or plain clothed, is the enforcement of Federal and State laws and County ordinances; to protect life and property and to keep the peace. DEPUTIES ARE PROHIBITED FROM ENFORCING HOUSE RULES. House rules are defined as rules that are not specifically authorized by state or federal law, and are typically rules of the outside employment Contractor. Officers shall follow all Travis County Sheriff's Office (TCSO) Policies and Procedures.

Officers engaged in a secondary employment job will not refuse to assist any citizen requesting or needing assistance. Officers are expected to take necessary action in an attempt to assist citizens in need of help by calling on-duty officers, taking reports, effecting arrests, or providing any other services related with the duties of a peace officer.

CONTRACTOR'S RESPONSIBILITIES: The Contractor agrees to hold harmless TCSO and all TCSO personnel from losses of any kind caused while at the site of the secondary employment. All traffic control jobs must be approved by the jurisdictional authority, such as TXDOT or Travis County Transportation and Natural Resources before we allow our officers to work. *Scheduling officers DOES NOT constitute safety approval.*

REVOCATION FOR SECONDARY EMPLOYMENT APPLICATION/PERMIT: The Sheriff's designee will not approve any application by a prospective Contractor that does not meet the requirements of any TCSO Policies and Procedures. Examples for revocation are for informational purposes only and is not intended to be exclusive of other reasons not contained therein: a conflict of interest develops between the County and the outside Contractor; non-payment of employees; Contractor is arrested; the Contractor is under investigation by the District and County Attorney's Office, or any Law Enforcement Agency for violations of law; the Contractor refuses to cooperate with an investigation related to the secondary employment job; the job becomes controversial, such as labor or civil disputes; the Sheriff, acting personally or through a designee, reserves the right to deny any application for secondary employment of law enforcement.

PAY RATES:

COUNTY-OWNED VEHICLES - $20 per hour with a 2-hour minimum [A Vehicle User Agreement must be completed to utilize these emergency vehicles]

OFFICERS - $40 per hour with a 4-hour minimum
- $43 per hour with a 4-hour minimum – for Police Bicycle Certified Officers (these officers may be utilized for large events)
- $50 per hour with a 4-hour minimum – for requests received less than 48-business hours for need of officer
- $50 per hour with a 4-hour minimum – for supervisors if your request requires a supervisor
- $60 per hour with a 4-hour minimum – per officer on all County-approved holidays
- $60 per hour with a 4-hour minimum – plain-clothed officers [Only specially trained officers are utilized for these requests] We reserve the right to determine if your request requires a plain-clothed officer

There is a cancelation fee of the minimum for officers and vehicles if you cancel with less than 24-business hours' notice.

15.115A- Promoter/Organizer Guidance Document for Mass Gathering Health Requirement Checklist
http://www.statutes.legis.state.tx.us/SOTWDocs/HS/htm/HS.751.htm

This guidance document refers to the Health Department requirements for the Mass Gathering Permit Application required by the Travis County Commissioner's Court.

The Promoter/Organizer of a Mass Gathering held in the unincorporated areas of Travis County, shall submit, no later than 45 days before the event date, a completed Health Requirement Mass Gathering Checklist (attached) to

Austin/Travis County Health and Human Services Department
Environmental Health Services Division
PO BOX 142529
Austin, TX 78714

Walk-in Services:
1520 Rutherford LN., suite 200

When completing the Health Requirement Mass Gathering Checklist, follow the Health and Safety Mass Gathering Application procedures and Health and Sanitation requirements for Mass Gatherings found in the:

1) Texas Health and Safety Code, Chapter 751: Mass Gatherings (751.004 Application Procedure) and
2) Texas Administrative Code, § 265.3 General Sanitation (Health and Sanitation for Mass Gatherings).

Promoter/Organizer Mass Gathering Application Procedure:

a. After completing the permit application requirements as per Health and Safety Code, Chapter 751 and TAC 265.3, the Promoter/Organizer will file the application with the Travis County Commissioner's Court for the Judge's approval and the Health Requirement checklist with the Environmental Health Services Division. The filing is done **no less than 45 days prior** to the event. The Travis County Judge's office is located at 700 Lavaca, Austin, TX 78701, phone number 512-854-9555.

b. No later than 10 days before the date of the gathering, the judge shall hold a public hearing on the permit application. At the hearing anyone may testify for or against granting the permit.

c. After the hearing the judge will enter his finding in the record either granting or denying the permit.

d. If the permit is granted and the county judge finds that preparations for the gathering will not be completed by the start date, the judge may revoke the permit. The judge must give notice of the revocation 24 hours before the permit is revoked.

e. The Promoter/Organizer affected by a revocation may appeal to the Travis County District Court .

Additional Information:

The Promoter/Organizer permit application filed with the Commissioners Court shall also include the Mass Gathering requirements from the following Agencies:

- Fire Marshal (Fire Code Permit Application),
  5555 Airport Blvd., Ste. 400, Austin, TX 78751 or by calling 512-854-4621
- Health Authority, (Environmental Health Services Checklist)
  1520 Rutherford LN, Austin, TX 78757 or calling 512-978-0300 FAX 512-978-0322

II. **Sanitation Information:**

Toilet Facilities (separate facilities for each sex & plainly marked "Men" and "Women"):

- ✓ 1Facility/50 persons. Labeled location on the site plan
- ✓ Contract agreement with toilet facilities provider attached

Hand Washing Facilities with Running Water:

- ✓ Labeled location on the site plan.
- ✓ Adequate soap and paper towels

Water Source (must show location(s) on a map):

- Is water Public water? Y If Yes, name of Water Company: Water Monster
- Private water? ___ If yes, must have a copy of contract agreement and a copy of water test attached to checklist

- Adequate supply (At the rate of 1 pint per hour per person) ✓ yes ____ no.
- Label location on the site plan
- Adequate water dispensing equipment (single use cups, etc.) ✓ yes __ no.

Waste Collection and Removal According to TAC § 265.3

- Contract agreement with solid waste company attached to checklist ✓
- Frequency of pick-up noted on contract. At each inspection trip ticket(s) must be available ✓
- Label disposal site location on the site plan. ✓

III. **Food Services Facilities:**

- Label location of all Temporary Food preparation sites on site plan.
- Provide a list of Travis County Mobile Vendors you have approved to be on site
- Promoter, or his identified representative, must ensure that Food Service applications are submitted, at least (10) days in advance of event

IV. **Required Site Plan information to be submitted with Health Checklist:**

- ✓ Number, type and location of toilets
- ✓ Number and location of hand washing facilities
- ✓ Water supply locations
- ✓ Food service locations
- ✓ Solid waste collection locations

Mr. Ryan Miller

RE: Psych Fest – Confirmation of Services

Dear Ryan:

Lone Star Latrine is pleased to confirm that we will be providing the portable restroom facilities and trash/recycling services at the 2014 Psych Fest.

Please let me know if you have any questions or need additional information. You can reach me at 512-450-4240.

Best regards,

Ryan Pierce
President
Lone Star Latrine
Ryan@lonestarlatrine.com

2014 Pysch Fest Plan

Lone Star Latrine will be supplying the portable toilets, trash/recycling services, potable/non-potable water services, fencing, restroom, and shower trailers for the 2013 Pysch Fest.

Lone Star Latrine will load in the portable toilets, dumpsters, restroom/shower trailers, and fencing in designated areas prior to the start of event. sight maps demonstrate locations of all equipment.

Lone Star Latrine will be on-call during complete duration of event. We will be in charge of servicing the toilets as needed, dumpsters, shower/restroom trailers, food service vehicles as needed. We will patrol the perimeter of the event staying on the outer access road away from the crowd. We will only service in the venue area at slower times during event in order to gain full access to equipment.

In the event of a waste spillage, I have attached the Lone Star Latrine waste spill contingency plan as well as our dumping policy with the COA.

If you should have any questions are concerns, please feel free to contact me.

Thanks,

Ryan Pierce
President

Up to 2350 + Gallons Potable Water Austin Psych Festival May 2-4, 2014 Carson Creek Ranch Delivery includes on site time of no longer than 30 minutes	3	165.00	[redacted]
Texas Bulk Water holds a Class D Water Operators License # WO0031441 and is Permitted under TCEQ-PWS #1050174			
We are little flexible on the on site time, but last year at the Psych Festival we ended up being on location for over two hours each time as there was no other water venders and all the venders were told that water was going to be provided. This was not the case so we ended up providing water to all the venders at our cost. We just request that the venders are aware that the delivery will be your event needs and we can not provide all venders water without compensation.			
We are looking forward to providing you service.

Attn: Mr. Yvan Miron

Re: SL320 Mobile Stage – Use in the United States
MEG File No. 103096 Task 26

McLaren Engineering Group (MEG) has reviewed the SL320 Mobile Stage system 2004 version for general use in the United States. The calculations and drawings were produced under the direct supervision and responsible charge of "the undersigned." The final documents are the result of a comprehensive evaluation by MEG and include approved revisions as needed resulting from these engineering reviews. **We believe that the erected system will safely support the approved loading and environmental conditions if properly assembled and used in accordance with manufacturer's recommendations and as noted herein.**

The assessment by MEG only considers the fully erected SL320 Mobile Stage structure and its standard features, including wind walls, adjustable side sound hangers ("ECS"), and front-of-house rigging trusses. Additional items such as auxiliary components, P.A. side platforms, hydraulic systems and erection devices were not considered in this review. The fabrication, design and operational procedures meet or exceed the requirements of ANSI E1.21-2006 "Temporary Ground-Supported Overhead Structures Used to Cover the Stage Areas and Support Equipment in the Production of Outdoor Entertainment Events." The design loads were derived from ASCE 7 and ANSI E1.21. Steel design was performed using AISC-LRFD provisions. Plywood was designed using APA provisions.

The design and construction of the erected stage assembly meets the applicable requirements of IBC-2009 Chapter 16, with the following suitable adjustments:

1. The mobile stage is erected for a very short period of time and protective actions will be taken by trained personnel under specified environmental conditions. Environment loads in ASCE 7 and IBC, including wind, are based on statistical probabilities that relate to time. Reductions in design loads have been taken using the provisions of ANSI E1.21 to account for such conditions. The wind design loads for the mobile stage far exceed the minimum permissible using E1.21.

2. ANSI E1.21 allows reduced wind loads compared with IBC only if weather is monitored and if certain actions by trained personnel can be accomplished. The

procedures in the User's Manual comply with and exceed the minimum requirements of E1.21.

Stageline Mobile Stage Inc. furnished the following material for review:

1. SL320 (2004) Mobile Stage Design Brief, dated July 2004
2. SL320 (2004) Users Manual, dated July 2004
3. Matrix structural computer model analysis results using "Visual Design" software by Civil Design Inc.
4. SL320 (2004) assembly drawings and select detail shop drawings
5. Load test reports for selected components
6. Stageline Mobile Stage Equipment "Wind Resistance and Procedures in Case of Heavy Wind," dated September 27, 2011

The SL320 Mobile Stage is to be used as a performance or similar platform for short-term temporary use in outdoor environments. The mobile stage travels as a tractor trailer; when it arrives on site, the Certified Operator and crew deploy and erect the stage roof and stage platform assembly. The trailer chassis remains in place as the center portion of the stage. The mobile stage bears on grade that is suitable to support the truck and tractor trailer. The Certified Operator in conjunction with the Event Producer are responsible for confirming that the ground bearing conditions are suitable as per the User's Manual.

The mobile stage has a roof, available rigging points, and optional fabric wind walls. The stage is a temporary performance platform and not a legitimate theater stage, and as such, is not subject to the same live loads. The SL320 has a stage live load rating of 100 psf. The SL320 has a roof live load rating of 20 psf unrigged or 16,000 lbs rigged, plus 4,000 lbs of capacity at the side sound hangers ("ECS") on the downstage corners. Standard Stageline stairs and guardrails are appropriate for performance use. Netting must be added to the guardrails for events in which the general public will have access to the stage area.

The stage roof is intended to support rigging loads, wind, and rain. It is not generally intended to support the weight of snow and ice. Use in locations and time periods where snow and ice are a possibility shall be reviewed and approved in writing by a professional engineer for the combined effects of rigged loads, wind, snow, rain and/or ice.

Users must understand and carefully adhere to the Rigging Diagram provided in the User's Manual. If the desired rigging loads deviate from or exceed those specified on the Rigging Diagram, contact Stageline Mobile Stage Inc. for advice. No adjustments or modifications should be made to the SL320 without first being reviewed and approved by Stageline Mobile Stage Inc.

As stated in the SL320 Users Manual, the stage system must be operated under the supervision of Stageline trained and certified personnel.

The mobile stage assembly is designed to resist a 90 mph 3-second wind gust without the wind walls, and 60 mph 3-second wind gust with the wind walls in place. A Stageline Certified Operator is required to monitor wind forecasts from an official weather information service for the entire period the structure is assembled. Stageline recommends that the Operator use an anemometer to measure wind on site for improved real-time wind monitoring. The Certified Operator shall take recommended actions listed in the User's Manual and in the attached "Wind Resistance and Procedures in Case of Heavy Wind" document, if wind gusts approaching the applicable limit are possible or measured. Depending on the situation, such actions include lowering of the roof if time permits, removal of vulnerable equipment, rapid mitigation of wind resistance from wind walls, and evacuation of personnel to a safe distance from the assembly.

Although not ordinarily required by governmental authorities for temporary structures, seismic loads have been considered for moderate and high seismic regions. The seismic loads do not govern the design, except for sliding in high seismic regions (see Design Brief - Earthquake Section), where lateral anchorage is needed to resist sliding.

MGM acknowledges that the SL320 Mobile Stage is a piece of equipment that serves the live event industry and it is not practical to involve engineers in typical usage. As such, it is the responsibility of the Stageline Certified Operator to adhere to the manufacturer's guidelines. In addition, if the mobile stage is part of a larger event with other structures, it is the responsibility of the Event Producer to understand the requirements of the Stageline equipment, to understand the responsibilities of the Stageline Certified Operator, and coordinate the Stageline mobile stage requirements with the event operational management plan. Please feel free to contact our office if you have any questions about our review.

Very truly yours,

The Office of
McLaren Engineering Group
M.G. McLAREN, P.C.

Certification

Stageline Mobile Stage Inc. Equipment

Wind Resistance and Procedures in case of Heavy Winds

We, from Stageline Mobile Stage inc., certify that the components identified below have been specified by the engineering department to meet the following wind resistance and also the NFPA 701-04 and ULC S-109 regulations (Standard Methods of Fire Tests for Flame Propagation of Textiles and Films).

MODEL	WIND Resistance	WIND Resistance (without windwalls)	WINDWALL AREA
SL100	60 mph or 97 km/h	80 mph or 129 km/h	679ft² (63.1m²)
SL200	60 mph or 97 km/h	90 mph or 144 km/h	490ft² (45.5m²) + 2 x 198ft² (18.4m²)
SL250	60 mph or 97 km/h	90 mph or 144 km/h	566ft² (52.6m²) + 2 x 243ft² (22.6m²)
SL260	60 mph or 97 km/h	90 mph or 144 km/h	599ft² (55.6m²) + 2 x 257ft² (23.9m²)
SL320	60 mph or 97 km/h	90 mph or 144 km/h	991ft² (92.1m²) + 2 x 600ft² (55.7m²)
PROMOBILE	60 mph or 97 km/h	90 mph or 144 km/h	594ft² (55.2m²) + 2 x 288ft² (26.8m²)
SAM440	60 mph or 97 km/h	90 mph or 144 km/h	1147ft² (106.6m²) + 2 x 731ft² (67.9m²)
SAM550	60 mph or 97 km/h	90 mph or 144 km/h	2 x 690ft² (64.1m²) + 2 x 747ft² (69.4m²)
SAM555	60 mph or 97 km/h	90 mph or 144 km/h	2 x 805ft² (74.8m²) + 2 x 793ft² (73.7m²)
Covered Sound Wings SL250/260	50 mph or 80 km/h	90 mph or 144 km/h	632ft² (58.7m²) + 2 x 112ft² (10.4m²) per side
Covered Sound Wings SAM555	50 mph or 80 km/h	90 mph or 144 km/h	2100ft² (195.1m²) + 275ft² (25.5m²) per side

27/04/11

A) Wind weather condition during set-up and dismantling of the stage and windwalls

The windwalls are the elements most at risk in windy conditions and the installation can become problematic. Wait until the wind has subsided before installing windwalls. If this is not possible, roll up windwalls and fasten with ratchet strap to the roof before raising the structure so it does not lash out and hurt anyone. We also suggest increasing your staff to have this operation completed quickly and more safely.

If wind speed exceeds 40 mph (65 km/h), windwalls and stage installation are not recommended. We highly suggest you wait until wind diminishes before completing the set up or dismantling the stage and windwalls.

B) Wind weather forecast condition when stage is up, fully pinned and prior to the start of the event

The Stageline Mobile Stages are designed to resist 3 seconds wind gust up to 90mph[1] (145 Km/h). However, this wind resistance depends on a proper installation of all support equipment and braces. In any weather conditions, the stage must be inspected and all its components must be secured.

If wind gusts are expected to exceed 50mph (80 km/h) for the upcoming event, roof structure should be lowered to reduce exposed surface and windwalls should be removed.

C) Wind weather condition when stage is up, fully pinned and during the event

The Stageline Mobile Stages are designed to resist 3 second wind gusts up to 90mph[1] (145 Km/h). However, this wind resistance depends on a proper installation of all support equipment and braces. In any weather condition, the stage must be inspected and all its components must be secured.

1. If wind gusts exceed 40mph, roll up all access doors. Remove all movable parts i.e. speakers, screens or lighting equipment or lower them to the stage floor and make sure they are tied down to limit any movement in the wind.

2. If wind gusts exceed 60mph (97 km/h), unclasp the windwalls. If the storm intensifies, openings should be slashed in windwall. It is better to sacrifice a windwall than to possibly damage the stage and/or sound and lighting equipment. Floating windwalls are dangerous for people standing near the stage. So, everyone should remain at least 100 ft (30 m) away from the stage.

3. If wind gusts exceed 90 mph[1] (145 km/h), the public and all personnel present must evacuate the premises and remain at least 100 ft (30 m) away from the stage.

Note: The most probable scenario during a violent storm is that the windwalls will be torn away. This is why it is so important to keep all technicians and the crowd at a safe distance.

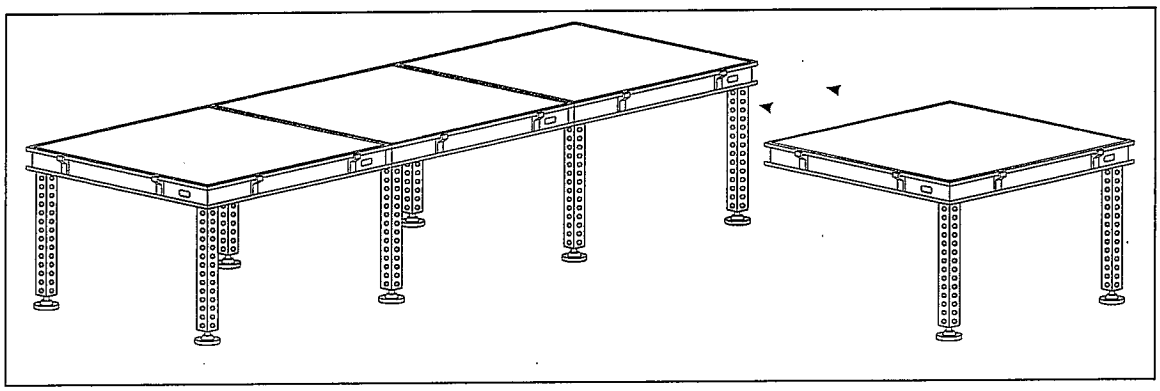
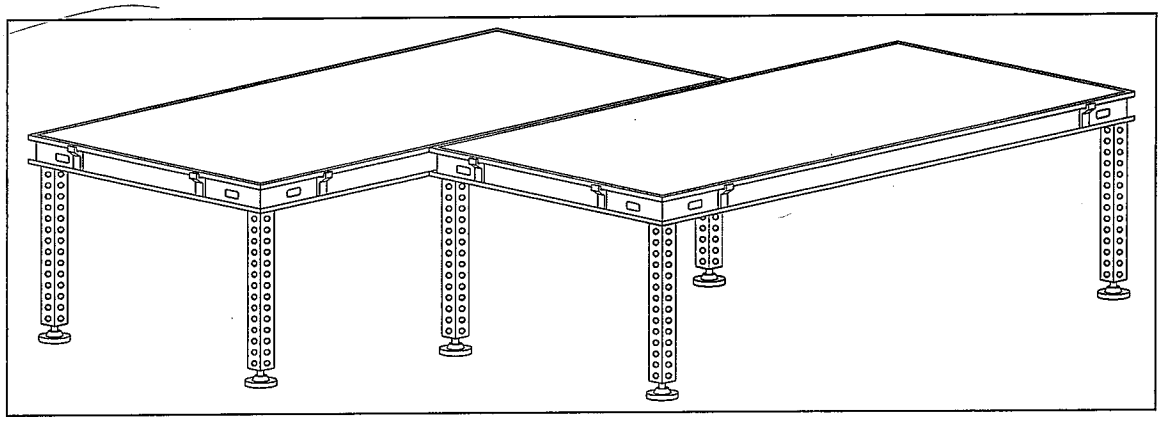
ASSEMBLY INSTRUCTIONS





PRINTED IN USA

P/N: LL-204-51

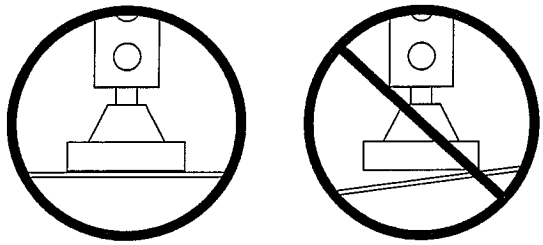
Assembly Instructions Include:

Step 1: Site Preparation
Step 2: Leg Assembly
Step 3-7: Setting the Stage
Step 8: Bracing
Step 9: Guard Rail Installation
Step 10: Stairs

BILJAX® Haulotte GROUP

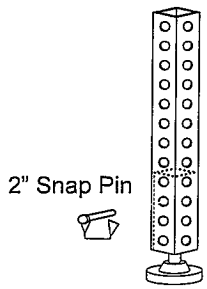
Step 1 Site Preparation

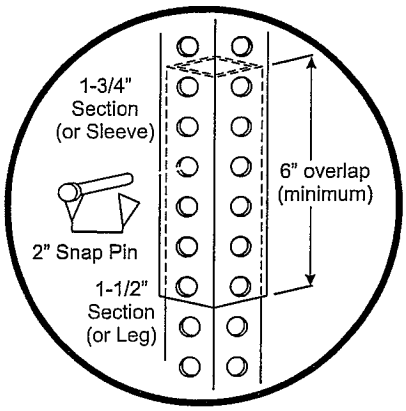
A. Determine the exact location where the stage will be erected.
B. For outdoor stages, mudsills are required to distribute the weight (125 PSF to 150 PSF) on the stage legs. This will prevent the legs from sinking and ease the leveling of the stage.
C. All base pads and mudsills should be placed only on a horizontal surface.



Step 2 Leg Assembly

Attach an adjustable rubber base pad to each galvanized leg using a 2" snap pin.



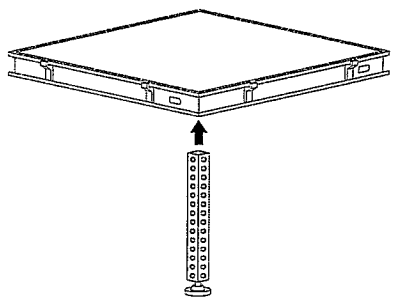


The leg sockets on the stage sections fit 1-3/4" sq. stage legs. Use one of the following only:

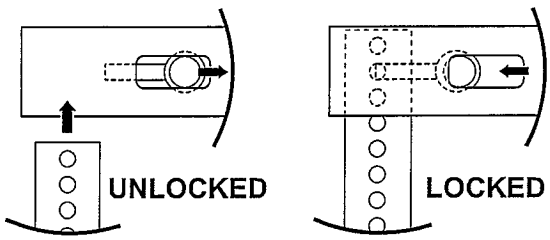
a) 1-3/4" telescoping stage legs. Overlap telescoping section a minimum of 6" and secure with a 2" snap pin as shown at left.
b) 1-3/4" non-telescoping stage legs.
c) 1-1/2" sq. non-telescoping stage legs with a 1-3/4" sleeve. Overlap sleeve a minimum of 6" and secure with a 2" snap pin as shown at left.

Step 3 Setting the Stage

A. Insert legs completely into all four corner sockets (and into intermediate sockets, when required) of the first stage section.
B. See Table on Page 8 for rated loads of all stage configurations.



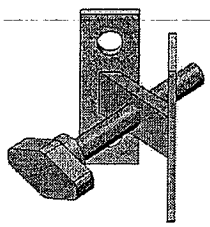
⚠ WARNING
Failure to properly install stage legs will result in serious injury or death.



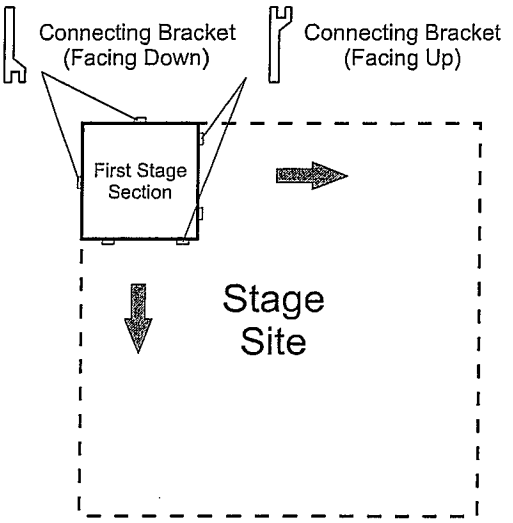
TO INSTALL STAGE LEGS:

- Pull and hold pin in the unlocked position.
- Insert leg. **IMPORTANT:** Pin is not a load-bearing member. Leg must be FULLY INSERTED so that it touches the bottom of stage deck.
- Release pin to lock leg in place.

C. Tighten the leg socket clip (image at right) at each corner socket where a stage leg is installed.



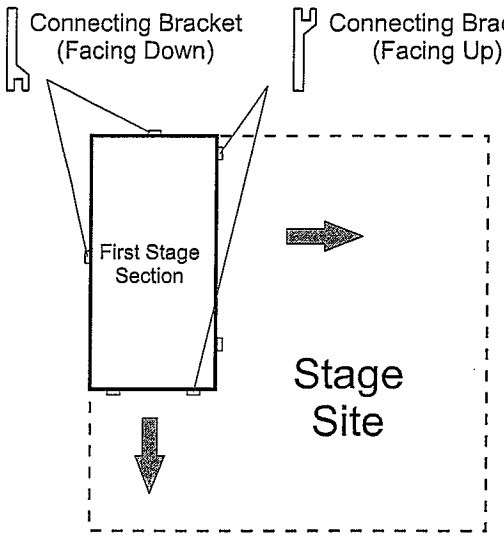
Step 3 Setting the Stage, Continued

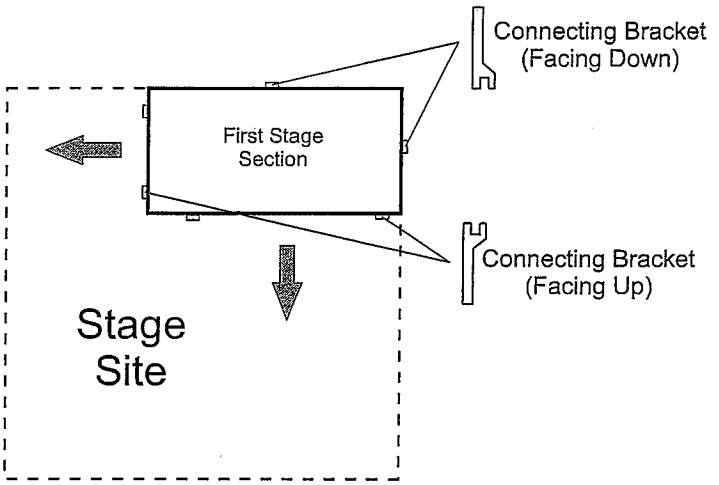


A. Set first stage section in back left-hand corner of stage site. Any corner may be used as a starting point when using 4' x 4' decks exclusively.

B. Align the stage section so that the connecting brackets facing up are inside the starting area and the connecting brackets facing down are outside, as shown in the diagram. *As additional stage sections are added, always make sure that the up-facing connecting brackets face toward the stage site.* Build stage in the direction(s) indicated by the arrows in the diagrams below and at right.

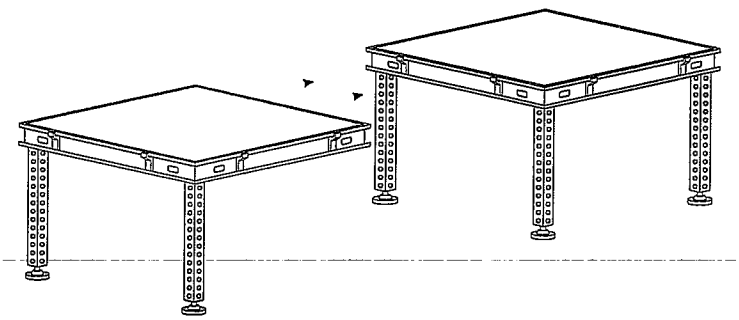
NOTE: When using 4' x 8' stage sections, adjust the starting point to achieve desired stage position and shape. Up-facing connecting brackets should always face toward the stage site.





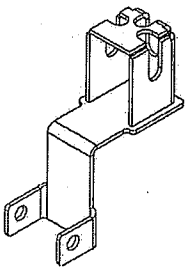
Step 4

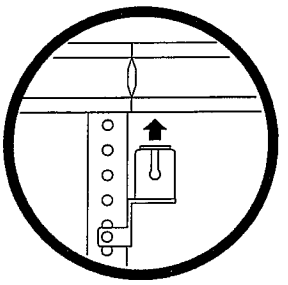
A. Set the back row of stage sections first.
B. Insert two legs into each additional stage section, as shown, and attach to previous section by inserting the connecting brackets into the C-Channel of the adjacent stage section.
C. Additional stage sections should be attached so that connecting brackets facing up are inside the starting area.



Step 4 Continued

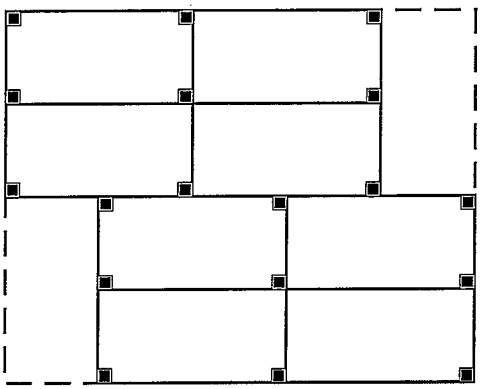
D. Install Leg Brackets, as necessary. Leg brackets (shown at right) should be installed into empty leg sockets along the perimeter to prevent stage sections from sliding. Leg brackets are installed in the same way as stage legs, as shown in Step 3.





Step 5

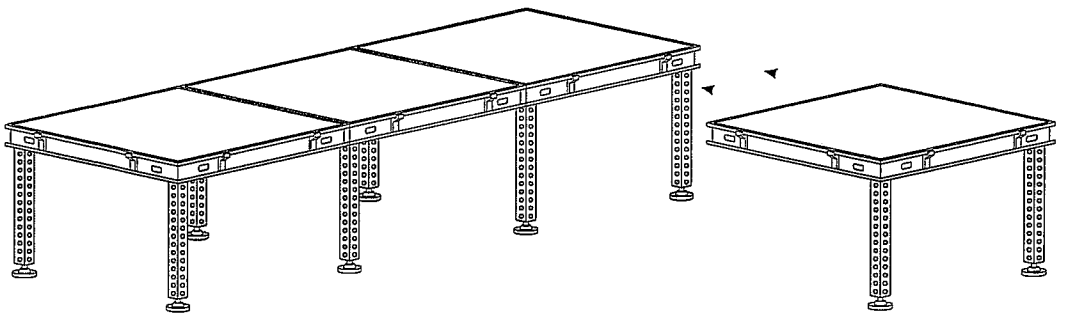
The modular design of the AS-2100 allows stage rows to be staggered. When staggering rows of stage sections, install 4 legs into the first stage section of each staggered row, as shown.



■ = Installed Stage Leg

Step 6

After completing the back row of stage sections, begin the second row by attaching one section with two legs.

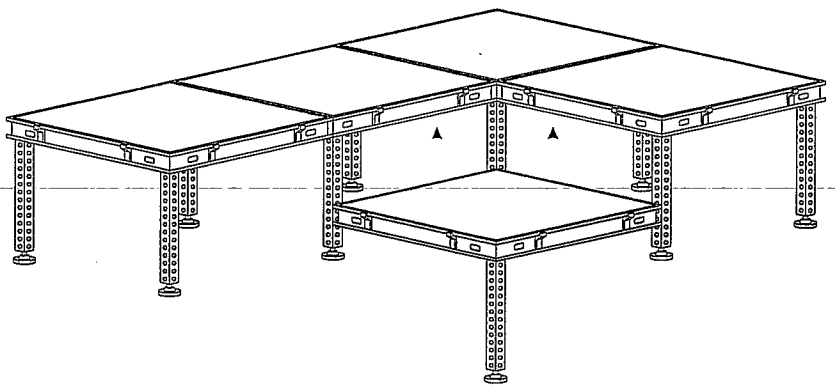


Step 7

To continue the second row, completely insert one leg into corner socket of one stage section and attach to adjacent sections as shown.

Additional sections in each row are assembled and attached in a like manner.

Repeat Steps 6-7 for each additional row.



Step 8 Bracing

Bracing is required on stages with a height greater than 30." Users may choose either horizontal or diagonal bracing. Follow the instructions below for the chosen bracing method.

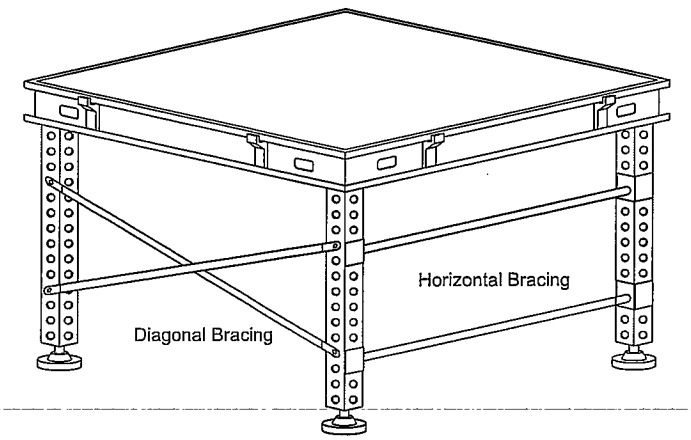
A. Horizontal Bracing

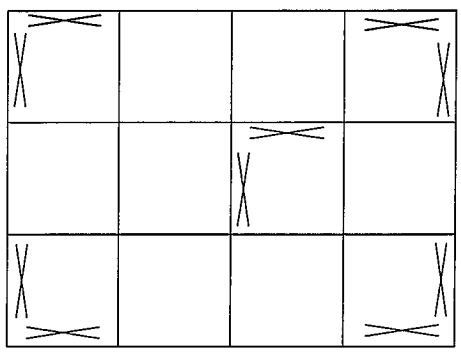
1. Brace each corner and every third bay along each side, using two braces per bay. To install horizontal braces:
   A. Insert brace pins into stage legs.
   B. Turn bracket until it is perpendicular with the stage. Bracket lip should rest flush against the outer edge of the stage leg.

   C. Tighten the hex nut on the front of the horizontal brace to secure the bracket.
   D. Reverse the procedure to remove braces.
2. Use three braces per bay for heights greater than 48." The space between braces should be at least 12."
3. Internal braces should be placed in different rows than perimeter bracing to increase stability.

B. Diagonal Bracing

1. Brace each corner and every third bay along each side. Attach diagonal braces using 3/8" x 2-1/2" hex bolts and wing nuts. Double brace stages when height exceeds 48."
2. When using double diagonal bracing, at least one of the braces should span the connection between the 1-1/2" and the 1-3/4" telescoping sleeve.





Brace corners and every third stage section as shown.

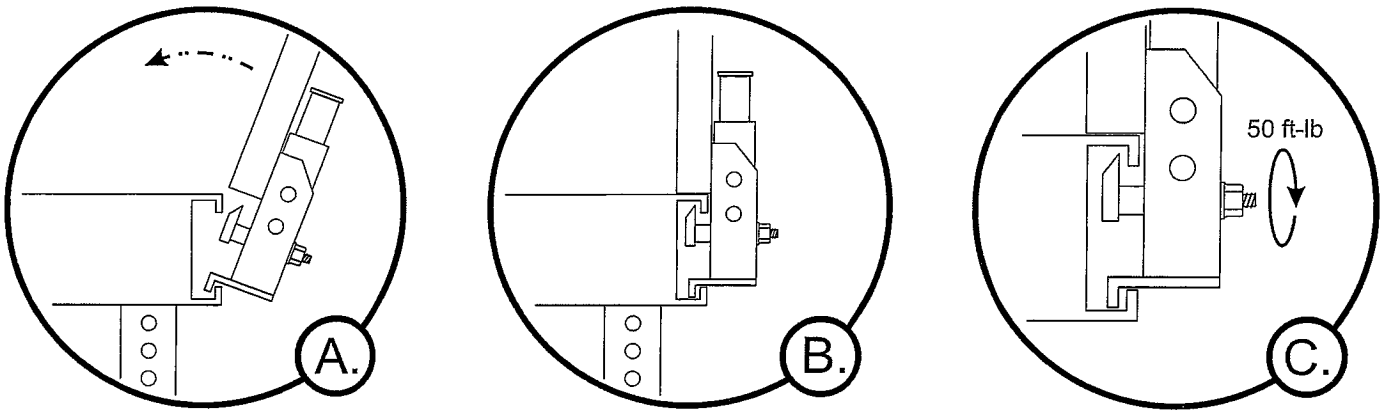
⚠ WARNING

Always consult the BilJax Application Department for proper bracing requirements when stage height exceeds 5'6". (1.800.537.0540)

Step 9 Guard Rails

Each guard rail section has two T-Locks to secure the guard rail to the Multi-Stage. To install guard rail:

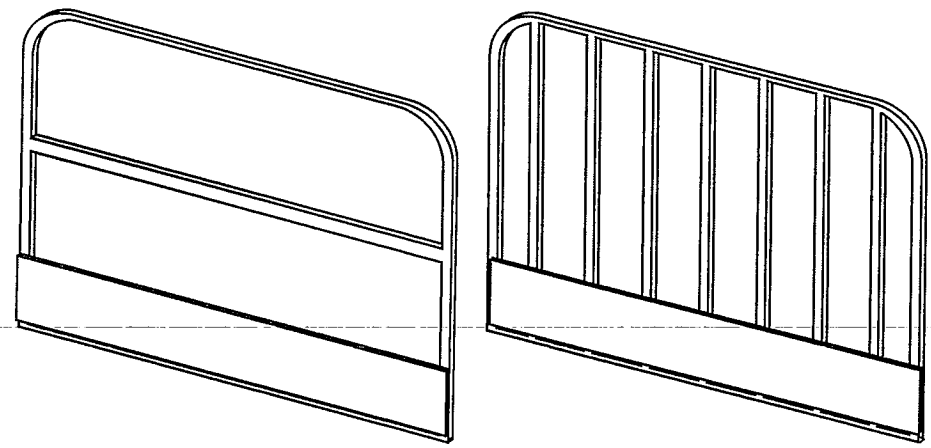
A. Set the lower lip of the guard rail lock inside the C-Channel along the perimeter of the Multi-Stage.
B. Swing the guard rail up until the T-Lock is fully seated within the C-Channel of the stage. Press down on plunger if necessary to seat T-Lock.
C. Tighten the hex nut on each lock to 50 ft-lb.
D. To remove guard rail, loosen hex nut and depress plunger to release T-Lock.



⚠ WARNING

Failure to correctly install guard rails could result in serious injury or death. Verify that each T-Lock is fully seated inside the Multi-Stage, as shown in Figure B, and guard rail is secure. T-Lock will click audibly when it is installed.

Section 1012 of the International Building Code and Section 1008.5.7 of the Uniform Building Code require the use of guard rails with vertical posts no greater than 4" apart when the stage height exceeds 30."

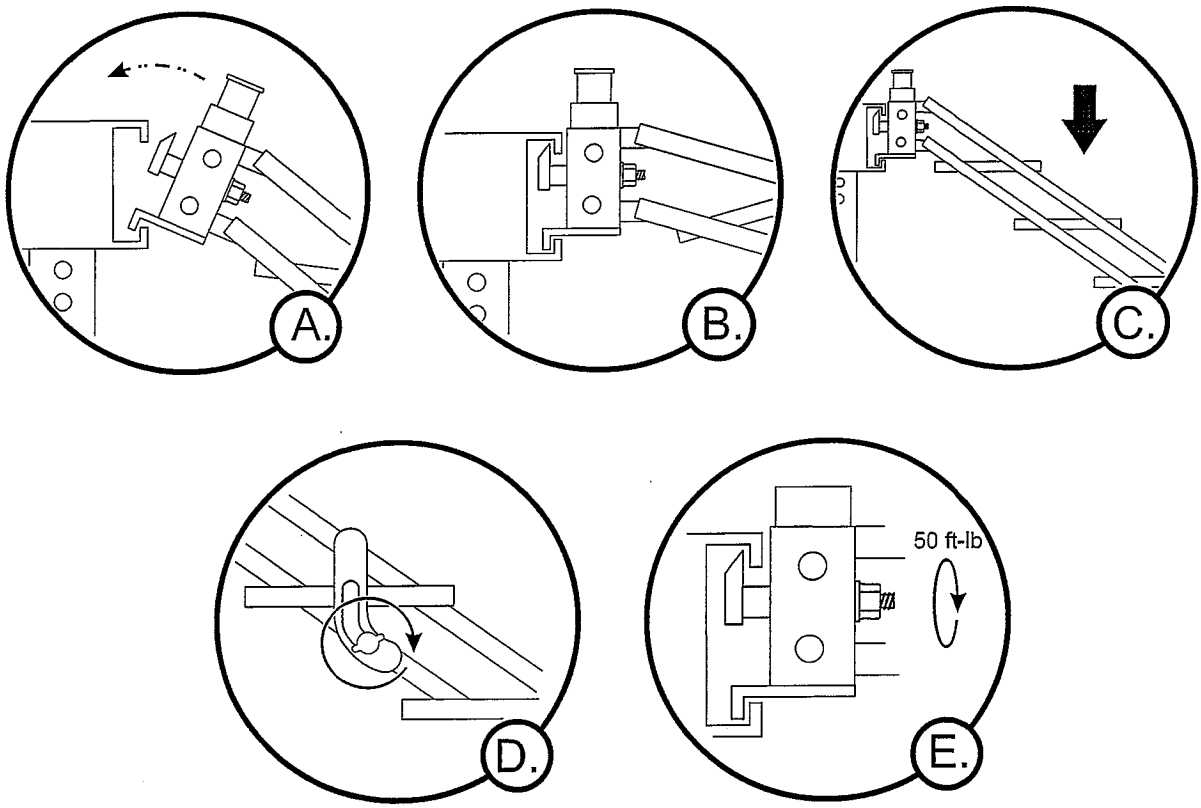


Step 10 Stairs

Each set of stairs requires a T-Lock adapter to secure the stairs to the Multi-Stage. To begin, attach the T-Lock adapter to the stair assembly using the bolts provided.

To install stairs:

A. Set the lower lip of the lock inside the C-Channel along the perimeter of the Multi-Stage.
B. Swing the stairs assembly up until the T-Lock is fully seated within the C-Channel of the stage. Press down on plunger if necessary to seat T-Lock.
C. Extend the stairs section so that the end opposite the stage is touching the ground.



D. Fully tighten the wing nut attached to the banana clip on each side of the stairs.
E. Tighten the hex nut attached to each T-Lock to 50 ft-lb.
F. Install handrails.
G. To remove stairs section, loosen the wing nut attached to the banana clip, loosen the hex nut and depress plunger to release T-Lock.

⚠ WARNING

Failure to correctly install stairs could result in serious injury or death. Verify that each T-Lock is fully seated inside the Multi-Stage, as shown in Figure B, and stair section is secure. T-Lock will click audibly when it is installed.

Replacement Parts

Call BilJax at 1.800.537.0540 or contact your regional BilJax representative to order replacement parts.

Page 1 of 3

Application for Use of State of Texas Right of Way for Temporary Signs for Special Events

Please print or type information

Date: 4/3/14

To the Texas Department of Transportation (TxDOT)
c/o Area Engineer Mike McKissack, P.E., Texas

This form must be received at least 7 days prior to proposed use on the right of way.

Applicant Austin Psych Fest proposes to place a sign within the right of way of Highway _____ Location _____ in Travis County, Texas.

☒ Check here for placement of multiple signs and submit the information requested on the Supplemental Sheet.

The temporary structure/vehicle will be placed _____ feet from the roadway and will have the following characteristics:

Mounting Height _____ Thickness _____
Sign Dimensions (Height, Width, Length) _____
Sign Material _____
Sign Support Dimensions _____
Sign Support Material _____
Proposed Text _____

Background Color _____ Legend Color _____

The right of way will be used FROM DATE 5/1/14 TO DATE 5/5/14 (maximum of 60 days) and the nature of the event is a foot race

The sponsor of the event, if applicable, is _____

I will avoid or minimize impacts, and will, at my own expense, restore or repair damage resulting from this event.

I will be responsible for any damages or accidents that may occur during the term of this permit and save TxDOT and the State of Texas harmless.

I will abide by all applicable federal, state and local environmental laws, regulations, ordinances, and any conditions or restrictions required by TxDOT to protect natural and cultural resources of the right of way.

If this event causes hazardous traffic conditions to develop, I will cease the activity until corrective measures have been implemented.

It is expressly understood that TxDOT reserves the right to enforce the terms and conditions that it may deem necessary for the protection of the transportation facility and safety of the traveling public.

By signing below, I agree to the conditions/provisions included in this application. I am authorized to sign on the behalf of the organization holding the event.

Signs must be constructed of heavy cardboard, plastic, fabric mesh or plywood, no thicker than ¼ inch.

An approved sign must not:
- exceed 16 square feet in placed on the roadside to inform the traveling public;
- exceed four square feet if used to guide participants in a bicycle or pedestrian event;
- extend more than three feet beyond the pavement edge if the sign is a banner; or
- imitate or resemble any official traffic sign, signal, or device.

An approved sign may not be placed:
- in a location where it may prevent the driver of a vehicle from having a clear and unobstructed view of official signs and approaching or merging traffic;
- on any highway appurtenances, including, but not limited to bridges, traffic control devices, official signs, sign supports, and light standards, poles, and delineators;
- on a tree or other natural feature;
- less than 18 ½ feet (clear) above the pavement if the sign is a banner placed over the pavement; or
- closer to the pavement edge than official highway signs, except for those signs used to guide participants in a bicycle or and pedestrian event.

TxDOT reserves the right to remove a sign if it becomes a hazard due to inclement weather, inadequate maintenance, accidental damage, or other hazardous cause. A sign approved for temporary use may not be erected more than 24 hours prior to the event. However, if the sign is a banner it may be installed no more than 30 days prior to the event.

It is understood that a sign must be removed within 24 hours of the completion of the event; except banners shall be removed within seven days of the completion of the event. A special event sign not removed within the allotted time is subject to removal by TxDOT and the applicant is liable for removal and disposal costs.

It is expressly understood that TxDOT does not purport, hereby, to grant any right, claim, title, or easement in or upon this highway. In the event the party fails to comply with any or all of the requirements as set forth herein, the approval may be revoked and TxDOT may take appropriate action.

The Austin Psych Fest is proposed to be held at Carson Creek Ranch, 9501 Sherman Road, Austin, Texas in Pct. 4. This is the site used in 2013 for the Psych Fest. This event will attract up to 5,000 people on four consecutive days. Attendees will begin arriving Friday, May 2 at 10:00 am. The music will begin at 2:00pm on May 2 and continue until 01:30 am the following morning. The music will begin again at 2:30 pm on May 3 and continue until 01:00 am the following morning. The music will begin at 2:30 PM Sunday May 4 and will continue until 01:00 am the following morning. All attendees should leave the property by 12:00 Noon on Monday, May 5. More detail surrounding daily schedule is included in the back up documentation.

Persons under age 16 will not be admitted unless they are accompanied by a legal guardian. Attendees who choose to drink must present a valid proof of age.

Food and Drink vendors will be on site.

Overnight campers will begin arriving at 10:00 am on May 2. The event promoter expects 1,000 to 1,500 people to camp overnight at the site.

A fire watch will be provided by Travis County Fire Marshal at the expense of the applicant.

Travis County Fire Marshal Office has reviewed information submitted regarding this proposed event. This event is capable of meeting all life safety requirements. Final approval by Travis County Fire Marshal will be subject to an on-site inspection after the structures, generators and vendors are in place.
