

Hamilton Pool Road Safety Improvements Project

Hamilton Pool Road - Project Update 2/10

Thank you again for taking the time to participate in the Hamilton Pool Road Safety Improvements Project (from RR 12 to East of the switchback of the Pedernales River). There were 65 attendees at the public meeting on October 29, 2015 where 106 mapped comments were submitted and 100 online surveys completed. This valuable input will help the project team as we continue to identify & address safety concerns along the project.

Next Steps

Travis County and the project team will continue to evaluate safety needs, mobility, and environmental features while balancing this with the public input received.

The County is moving forward with the design of the bridge over Hamilton Creek and the improvements to the entrance at Hamilton Pool Park. A list of feasible safety improvements is also being developed from the review of safety concerns listed through the public input process and engineering study. These will be placed in groups, ranked, and a cost estimate will be developed for each one to assess funding needs and plan implementation of the selected improvements.

Another public meeting is anticipated to be held this summer, to present the lists and to collect public input. Meeting notifications will be posted on the project webpage and sent via email.

Please let us know if you need any additional information and thank you again for being involved in this project.
